

Basic Premise

Word Fill

- ② Objective: Complete the translation for the ENG or MI word displayed at the top of the screen.

- ③ Player can move left and right only. Player must collide with the fish with the correct letter for the current place in the word. Player can "shoot" (fish, catch, etc.) to get rid of fish with the wrong letter. If a wrong letter fish hits the player, they take damage.

Misc Ideas/TBD

- Coins ?
 - Powerups from shop ?
 - Bonus level between levels instead of its own?
 - Extra bonuses for good score?
- low do they interact?

Coding Perspective

- Camera locked to screen
- Slight movement for visual flair?
- Background and water scroll to give the illusion of constant movement
- Both scroll at different rates
- Enemies "jump" on a curve (randomized)

3 options for enemy spawn:

Random:

Enemies spawn at random intervals in random positions

Set:

Enemies spawn on set intervals and set positions

Hybrid:

Self-Explanatory
